## Education

Atria Institute of  
Technology, Bengaluru

— Bachelor of Engineering  
(2016-2020 )

- Stream of Education: **Information Science and Engineering**
- CGPA: 7.28

# Experience

## **Software Developer , TechMahindra .**

### **Bengaluru**

january 2023 - present

- worked on an e-commerce website built with Next.js. My main contributions were developed the product pages using Next.js's server-side rendering (SSR) capabilities to ensure that they loaded quickly used Next.js's built-in performance optimizations, such as image optimization and code splitting, to ensure that the website loaded quickly and ran smoothly on all devices.
- Framework and Technology used : Next js,Mongodb.

## **Software Developer , CleanKoding .**

### **Bengaluru**

september 2022 - january 2023

- Worked on making the UI Responsive .
- Implemented Dynamic Routing and Login functionalities .
- Framework and Technology used : Next js , Reactjs, Redux.

## **Assistant System Engineer , Tata Consultancy Service**

### **Bengaluru**

January 2021 - May 2022

- worked on a full-stack web application built with React, SCSS, and Express. I worked with the design team to create a responsive and user-friendly design for the web application that looked great on all devices and was easy to navigate. used SCSS, a preprocessor for CSS, to style the front-end of the web application..
- Framework and Technology used : Reactjs,Redux.
